- Crashes are the #1 killer of teens.
 - Nearly 4,000 teens ages 16 to 20 die in traffic related crashes every year in the U.S.
 - Teens have higher fatality and injury rates in traffic crashes than any other age group.
 - The fatality rate for drivers ages 16 to 19, based on miles driven, is four times higher than for drivers ages 25 to 69.
 - In spite of this, teen drivers and passengers — especially young men — are among those least likely to wear their seat belts.
 - Well over half of all teens killed in traffic crashes every year are not buckled up.
 - Buckling up is the absolute best way you can protect yourself from severe injury or death in the event of a crash.
 - No seat belt can mean no future!
